Textron Aviation Global Customer Support

Textron Aviation delivers the best aircraft in its class to every customer and aircraft owners are assured of the very best in service and support wherever they fly. The King Air is backed by the largest network of factory trained maintenance facilities in the industry. Support is provided through a wide network of Factory Owned and Authorized Service Centers. Each center is staffed with factory trained technicians and equipped with the tools, equipment, and parts to keep the King Air ready for use at all times.

Training

Flight crew and maintenance personnel training for the King Air 360 is provided by FlightSafety Textron Aviation Training.

ProAdvantage™

ProAdvantage™ is an optional maintenance and parts service plan that provides customers with eligible Beechcraft aircraft various options for comprehensive support - including scheduled and unscheduled maintenance, inspections and component removals. With ProAdvantage™, you have access to the most price competitive and easy-to-use service plans available in the industry today - making your aircraft ownership experience easier and more cost-effective by eliminating the guess work and variability of aircraft maintenance.

Textron Aviation presents King Air 360

You'll be pleased to know that this aircraft:

- Offers a full avionics package, featuring the Collins Aerospace Pro Line Fusion system with full regime autothrottle
- Has been equipped with a contemporary interior scheme
- Features accent lighting throughout the cabin and USB power plugs at every club location
- Will have an exterior painted to the owner's specifications from our professionally created designs
- Includes a training and warranty package

Exterior

The exterior paint scheme often provides the first impression of an aircraft. This unit is ready to be painted with the standard stripe design and standard colors of your choice. You'll work with a professional designer to create an exterior perfectly suited to your needs and tastes.

Performance

Maximum Cruise Speed	312 kt
Range: 1 Pilot + 4 Passengers (HSC)	1,533 nm
Max Operating Altitude	35,000 ft
Takeoff Field Distance (MTOW)	3,300 ft
Landing Distance (MLW)	2,692 ft

Flight Deck

Equipped with the Fusion system plus leather crew seats, adjustable sunvisors, sidewall storage pockets and cupholders, the flight deck offers pilots both performance and comfort. Pilot workload is reduced with the full regime autothrottle and the digital pressurization system.
